KEYDOMINATOR EDITING SOFTWARE

SOFTWARE DOWNLOAD

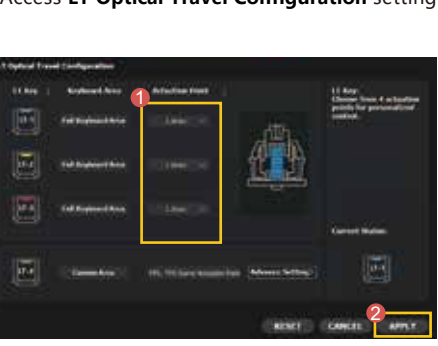

For optimal product performance and access to advanced customization features, please download and install the software from <http://bloody.com/en/download.php>.

- 1 **Keystroke Setting**
Customize keyboard function emulation, programmed keys, shortcut keys, and other settings to suit your preferences.
- 2 **Actuation Point**
Fine-tune the travel distance setting of LT optical switches for accurate typing and gaming experiences.
- 3 **Macro Editor II**
A player-centric programming platform tailored for users with programming expertise.
- 4 **Combination Setting**
A user-friendly player programming platform ideal for players without programming expertise, allowing for the creation of simple programming functions.
- 5 **Ultra Combo**
Access settings for advanced software and hardware functions.

FULL KEYBOARD AREA CUSTOMIZATION

Access LT Optical Travel Configuration setting by clicking 'Actuation Point' in the software.

Configuration Example: Adjust the factory preset travel distances for LT-1, LT-2, and LT-3 to 2.6mm, 1.8mm, and 1.6mm respectively.

- 1 Locate 'Actuation Point' in the software interface. Customize the LT Key actuation points according to the following steps:
A: Select 2.6mm from 2.0mm for LT-1.
B: Select 1.8mm from 1.6mm for LT-2.
C: Select 1.6mm from 1.2mm for LT-3.
- 2 Click (APPLY), then press the [] button to switch between the three saved full keyboard area actuation points without needing extra drivers.

FULL-KEY INDEPENDENT CUSTOMIZATION

Access LT Optical Travel Configuration setting by clicking 'Actuation Point' in the software.

Configuration Example: Customize the LT-4 default actuation point template to create a highly personalized game profile.

- 1 Go to Custom Area to set the default actuation point template for the gaming category.
- 2 Click (APPLY), then use the [] button to toggle between the saved full-key independent variable speed actuation points without needing drivers.
- 3 Click on 'Advanced Setting' to access the game actuation point editing platform and adjust the speed of both full-key and independent key actuation points for the game template.

ALPHA PLAYER CUSTOMIZATION

Game Template Configuration Example: Customize the actuation points of the WASD and space keys to 1.4mm for a game, while setting other keys to 2.0mm.

- 1 Go to 'Travel Distance' to name your FPS or TPS Game Actuation Point template. Once confirmed, a game template will be automatically generated. Then, proceed to adjust the Full Keyboard Area setting.
- 2 Set the Full Keyboard Area to 2.0mm, then proceed to configure the Single or Multiple Key settings.
- 3 Select W/S/A/D and the <SPACE> key to designate the actuation point as 1.4mm:
a Red key: Set the independent key actuation point to 1.4mm
b Black key: Set the full key actuation point to 2.0mm
- 4 Save in File Management, and the currently edited game template will be saved.game template has been saved.

- FN + [Up] / [Down] Lighting Brightness +/-

Q & A

- Question** Is the 4 speed switching of LT achieved without driving?
Answer Default 4 LT actuation point of 2.0mm/1.6mm/1.2mm/full key 2.0mm and independent key 1.4mm.
- Question** Can the 4 speeds of LT define their own full key or multi key actuation point?
Answer Full key speed and full key independent speed can be changed through software.
- Question** Can I restore the default settings for the 4 LT speeds?
Answer Click on the Restore Defaults button in the speed settings.
- Question** How to adjust the lighting brightness?
Answer Preset 4 levels of brightness, (High/Medium/Low/Off) by pressing [FN] + [Up] / [Down]

TECH SPEC
